N.B. Reference to Hetrich-Gutttag's book will reveal that almost every lot contains unlisted items or major varieties that are scarce or of some rarity. WHEN MAKING UP YOUR BIDS, please take into consideration that 98% of the tokens are uncirculated, many brilliant, with a sprinkling of proofs.

We are breaking off this series at this point to relieve the monotony of our floor bidders who may not be interested. For the balance of this fine OHIO TOKEN COLLECTION, please refer to LOT NO. 1175 in the second day's session.

THE VERY RARE RUSSIAN PLATE MONEY

- 1134 **Catherine I.** Grivna or 10 Kopecks 1725. Struck at the Ekaterinburg mint. During the reign of Peter I (1689-1725) a marked improvement in Russia's coinage took place. A number of experimental or pattern pieces were developed among them resulting in this specimen coin. References to old catalogs show the 1726 date being offered as was the specimen sold in the Boston Convention Sale last year, for \$80.00. This specimen dated 1725 may rightfully belong to the reign of Peter I. Copper plate measures $2\frac{5}{8}$ " square and is uniface. A circular counterstamp in the center bears the denomination, date and place of mintage in five lines. In the four corners are circular counterstamps of the Imperial eagle having a feathered breast. This remarkable specimen has full quarter inch margins around the four counterstamps, in extremely fine condition with a nice light brown tone. We believe it to be perhaps not unique, but nevertheless a very rare and beautiful coin. Ill. Num. 1939, p. 469 200.00

| 1249 | COMPLETE COLLECTION OF OHIO STORE CARDS. Lots 84-216 incl. and Lots 1175 to 1248 incl. The most complete collection ever assembled. This lot would only be sold if the bid was higher than the total amount of the individual bids. The successful bidder would also receive the owner's private catalog which gives much pertinent data. The complete collection totals over 1500 different pieces and contains over 150 new cards or varieties not listed in Hetrich-Guttag. They have been numbered in collaboration with the late Mr. Joseph Barnett. A conservative estimate of the value of this complete collection would be | 500.00 |

Many, Many Thanks

For your nice letters sent us on behalf of Katen Koin Kapers. Only 1 mild public brickbat (see “#\$\$ issue of ?(’%*5.) We will henceforth issue it as a regular feature.

For the faith placed in us by scores of consignors in our monthly auctions during the past year.

For and to the thousands of bidders and buyers and for the many letters praising us for conservative classifications and buying under their bids whenever possible.

For the expert attribution of difficult numismatic material by my friends who are qualified in particular fields. Their work has been love of coins and not for pecuniary gain.

For the Stowell's of Stowell Printing Co., publishers of our catalogues and former publishers of “The Numismatist” for a great many years.

For the many sponsors of our nomination to the Board of Governors of the A. N. A. by clubs and individuals, and for the votes that will be cast in my behalf. This is written three weeks before the Convention, but win, loose or draw, again **Many Thanks.**

**EARLY
AMERICAN CENTS**

By DR. WILLIAM H. SHELDON

Large quarto size, (9¼x6"), 406 pages, beautifully printed by Harker & Bro. on fine paper and handsomely bound. Included are 51 full-page collotype illustrations of the entire series of old coppers.

First Edition Price \$10.00

Numismatists will at once recognize the importance and usefulness of this definitive work on the U. S. cent-pieces of the early years of our country from 1793 to 1814. It provides a scientific description of the 327 known varieties issued in the period surveyed, whereby each can be easily identified by amateur as well as professional collectors. These "big cents," for which George Washington and his contemporaries gave their copper utensils, have never before been completely catalogued and described. Order and system are applied to the identification, grading and valuing of every known variety of early cent. By means of the plates, and the accompanying tables, even a stranger to numismatics can accurately identify and appraise the value of any early coppers.

Dr. William H. Sheldon, distinguished scholar and author of the famous "Human Constitution Series," has departed in this book from his remarkable psychological studies to aid his fellow numismatists. Numberless early monographs and original research have been brought together in a work that will be standard in its field for generations. The "Sheldon" numbers here supersede the chaotic numbering and classification systems heretofore used. Collaborating with Dr. Sheldon were Homer K. Downing and M. H. Sheldon, both well-known numismatists.
